## TELKWA WILL HAVE ATHLETICS

General Meeting of Association Elected Officers and Committees for a Busy Year

The annual general meeting of the Telkwa Athletic Association was held at Svenson's hall, Telkwa, at 8.30 p. m. on April 21st, which was attended by almost all the residents of Aldermere and Telkwa. The chair was taken by C. R. M. Gale, last years president, and everyone was full of enthusiasm.

The following officers were elected for the ensuing year:—

Hon. Pres.—R. J. McDonnell  
President—C. R. M. Gale  
Vice-Pres.—E. M. Hoops  
Sec.-Treas.—B. N. M. Hoops  
General Committee—J. J. McNeill, G. McDonnell, E. G. Ayliffe  
O. A. Reigle and Simpson.  
Football Captain—C. R. M. Gale  
Baseball Man.—O. A. Reigle  
Field Sports—G. McDonnell  
Financial Committee—T. J. Thorp, A. H. Wallace, R. L. Gale

It was decided to hold a dance on May 6th. A rough schedule of matches and sports was discussed and left to the committee to arrange and a busy season is expected.

### Will Lease the Silver Cup

While here a week ago George Clotheir made a trip to the Harris Mines with the intention of going on to the Silver Cup property on the top of Nine Mile. He found however, that there was too much snow and he came back to town. He gathered together sufficient information about the property and before he went to Rupert he informed the Herald that he had decided to close the deal with the Silver Cup company as soon as he reached the coast. He will be back in June and will then go in with his supplies and start the work. He looks for a very busy season on Nine Mile mountain.

D. J. Williams, superintendent at the Rocher de Boule mine, has been in Prince Rupert this week on business. The cable for the tram line arrived in Rupert and he had it sent up. The work at the Rocher de Boule is progressing very satisfactorily.

## BIG ROCK DRILLING CONTEST MAIN FEATURE OF ATTRACTIVE PROGRAM FOR VICTORIA DAY

List of Athletic Sports That Should Attract Best Athletes in the Province Has Been Arranged for Big Celebration in New Hazelton—Arrangements Being Perfected—Prince Rupert and New Hazelton Play Baseball Monday Afternoon—Grand Ball at Night

The sports committee in connection with the celebration here on May 24 and 25 have drawn up their preliminary program of sports. This list will be augmented as time goes on and at a later date the prizes will be announced but it may be stated, however, that the prizes will be substantial and will no doubt attract the best athletes in the district.

Among the features will be the rock drilling contest, the first to be put on in the northern interior. This contest has always proven most exciting, fascinating and thrilling. There are a lot of good rock men here and there

should be at least two or three teams entered.

The other sports are:  
Pack race carrying 50 pounds  
100 yard dash  
220 yard dash  
Three mile race  
Backward race 50 yards  
Tug of war  
Horse race  
Indians' horse race  
Run-hop-step and jump  
Run and broad jump  
Standing broad jump  
Running high jump  
Standing high jump  
Log chopping contest  
In addition there will be prizes

for the children which will be announced later.

Word has been received from Prince Rupert that the ball team in that town will come here for May 25 and the boys on the coast are now arranging for a special train to bring a big crowd with them. The ball game will take place Monday afternoon.

Monday evening a dance will be given and special music is being arranged for.

John Linguist is getting out plans for a residence to be erected on Twelfth Ave. near Kelly street for a Saskatoon man.

## G. U. RYLEY ONCE MORE TO THE FORE

Smithers is not a Grand Trunk Townsite he Says—They Sold the Land Outright

During the past week or two there has been a good deal of interest, unrest and anxiety evidenced throughout the district in a type written letter, supposedly sent out from the Grand Trunk Pacific Land Commissioner's office, Winnipeg, signed by G. U. Ryley, dealing with townsites on the main line of the Grand Trunk Pacific.

The letter, which is really in the form of a notice, states, in part, that the Grand Trunk Pacific Development Company Ltd., own exclusively the following townsites, and they have no agents for the sale of lots: Prince Rupert, a terminal; Endako, a divisional point; Prince George, a divisional point; McBride, a divisional point.

The said company has also a joint interest in South Hazelton, Houston, Fraser Lake and Willow river.

The land for the townsites of Vanderhoof and Smithers (the latter stamped in with red ink) was purchased from the Grand Trunk Pacific Development Co.,

and the owners arranged that the company should hold the title to the land and issue deeds to a purchaser when asked to do so.

(Signed)  
G. U. Ryley,  
Land Commissioner

The notice or letter referred to above is one worthy more than a passing thought. It is safe to say that practically every one in Smithers located there on the assurance that the G. T. P. Development Co. owned the townsite and that the railway company had selected it as the passenger divisional point.

No one would dare use the name of so wonderful and world-wide known man as G. U. Ryley as a joke, hence the notice must be genuine.

It looks funny to anyone not knowing the motive and it is now up to G. U. Ryley, the G. T. P. R. and Aldous & Murray Ltd. to hand the public an explanation of the Smithers complication.

Unless a satisfactory explanation is immediately forthcoming the attorney-general will undoubtedly institute an inquiry for the protection of those who have purchased lots.

Jas. A. Riley has accepted a position as operator on the Dominion Telegraph Service and he will be stationed east of Telkwa.

## SMITHERS TO SEND DOWN BIG CROWD

For Victoria Day Celebration Here—A Big Purse for Prizes—General Committee Met

Very satisfactory progress is being made by the various committees connected with the Victoria Day celebration in New Hazelton. At least five hundred dollars will be available for the prizes and expenses and everyone is now working with but one end in view, viz., to make this celebration a great success.

At the meeting of the general committee held last Friday night a letter was read from R. E. Williams, Smithers, stating that the people of that town would be glad to join with New Hazelton on May 24 and 25 and help make the affair what it should be. The secretary was instructed to write Mr. Williams expressing appreciation of his offer and extending a warm welcome to the Smithers people.

On another page of this issue will be found a list of the officers and committees which are handling the various departments.

Another meeting of the various committees will be held tonight at 8.30 sharp in the Northern Hotel dining room.

## WILL EXAMINE HARRIS MINES

J. T. Vaughan-Rhys Will Report to Vancouver People—Looks for a Big Movement

J. T. Vaughan-Rhys, of Prince Rupert, arrived in town Monday night and on Tuesday morning went up to the Harris Mines to examine the property and make a report to some Vancouver capitalists who are contemplating an investment in the Harris Mines. Mr. Vaughan-Rhys will return to town today and report at once to his principals.

In conversation with the Herald this well known engineer stated that the New Hazelton district was this year the centre of attraction in the mining world. He has received bona fide enquires from all parts of this continent and from London and Paris where there has always been large amounts of money always ready for investment in mines. He gave the Omineca Herald the credit for the great interest now displayed in the New Hazelton mines. I have, he said, seen your articles copied by the press in nearly all mining camps and the news of the big shipments of high grade ore is of great importance to mining investors throughout the world.

Mr. Vaughan-Rhys anticipates spending the most of this season here and Prince Rupert and before he returns to the coast he intends to renew his acquaintance with the various trails in the district to facilitate his work later on. Mining, he says, is the main industry this year and New Hazelton is the big centre for all new operations.

### Road Work Started

On Tuesday morning the road superintendent put a team and two men to work pulling surface roots out of Eleventh Ave. between Pugsley and Fielding Sts. The crew has since been increased to three men, a team and a scraper and a ditch is being made on the high side of the road. As the superintendent has not yet announced his program it is difficult to approve or disapprove this work. It was not, however, included in the requests or recommendations from this town.

## Mining Around New Hazelton

WRITTEN FOR THE OMINECA HERALD

New Hazelton lies between two big and rich mineral belts. That to the south covers Rocher de Boule mountain, an area of six by twelve miles, where the prevailing ore is high grade chalcopryrite with good gold values. To the north are Glen, Four and Nine Mile mountains, covering a similar area, and seamed with ledges of solid galena and carrying unusually high values in silver. Both mineral belts extend almost to the city limits and the most remote properties in either are never more than ten or twelve miles from the town and the Grand Trunk Pacific Railway. Government wagon roads or trails reach every section of both belts, or they are being built this year.

In the Rocher de Boule district the best, in fact the only developed property is the mine of that name. It covers a series of parallel ledges which outcrop for miles through the Highland Boy and Rocher de Boule Wonder groups. The main development to date is on the upper ledge where a 700 foot drift tunnel has opened three shoots of ore to a minimum depth of 160 feet. In this working the ore reserves are estimated to exceed 10,000 tons of an average value of fifteen per cent. copper and \$5.00 in gold per ton.

The Continental Development Co., of Butte, Mont., which is operating the mine under a two-year lease on the upper workings, has recently completed a hydro-electric power plant developing 200 horse power, installed a ten drill compressor and a tram line over the mountain is nearing completion. They are driving a main working tunnel that will give a total depth of 400 feet on the upper ledge. In its course the new tunnel will cut three other ledges on which more or less prospecting work has been done and in each of which pay ore has been encountered in good sized bodies at or near the surface.

The adjoining property to the Rocher de Boule, along the same vein systems, is the Highland Boy, which is being developed under a bond to the Butte Rocher de Boule Company. Here are some splendid surface showings of from two to four feet of solid chalcopryrite. Considerable surface work has been done on this property and one ore shoot has been opened to a depth of 70 feet by a 100-foot drift tunnel. As soon as work can be resumed this spring, a cross-cut tunnel will be started to tap two ledges at depths of 500 and 750 feet respectively.

Over the main summit of Rocher de Boule and on the east or Mud creek slope lies the Rocher de Boule Wonder group. This also has some excellent surface showings of rich gold-copper

ore in the same veins. O. B. Wallace, formerly manager of the Interstate mine near Wallace, Idaho, is developing this group under a bond taken late in the fall.

Adjoining the Rocher de Boule mine and lying just across the gulch from it on a parallel vein system is the Great Ohio, purchased last summer for \$40,000 cash by Raleigh P. Trimble, a young mining man of Portland, Ore. Mr. Trimble was the original bonder of the Rocher de Boule mine, did the first development work on it and is still owner of a large block of its shares. He is confident that in the Great Ohio he has a property which will respond with equal satisfaction to development. He has equipped it with a fine camp and is driving a tunnel which will give a depth of more than 600 feet under the first big ore outcrop. A compressor plant will be installed to expedite development in the near future.

Another parallel series of veins lying to the south and east of the Ohio is covered by the Red Rose group owned by Peterson and Eck. Only surface work has been done so far on this property, but one immense ledge has been traced for several thousand feet and this is to be opened by one or more drift tunnels this summer.

Further back in the range are a series of ledges with solid zinc and galena outcrops. They are known as the Brian Boru and Jones groups and are to be extensively developed the coming season.

All around and between these properties are numberless groups with ledges similar in character and ore outcrop to the Rocher de Boule and its better known neighbors. Among these should be mentioned, on account of their great promise, the Miller group, the Coolgardie and the Harris boys holdings.

The district is well timbered and watered, easy of access and convenient for mining operations on any scale.

## RUPERT BALL CLUB IS NOW ORGANIZED

Will Have a Good Team if the Grounds  
are Ready in Time—First  
Game at New Hazelton

(Prince Rupert News)

The ball fans got the spring fever last night and organized a baseball club and will now go after the grounds. There are a lot of ball players in the city and the boys think that a little enthusiasm will bring them out. They are going to organize a joint committee of all the athletic associations to urge the city council to get that recreation park ready. In the meantime the boys expect that they may be permitted to practice on the newly graded Market Place.

The officers are:—

Hon. Pres.—Wm. Manson

President—V. A. Cole

Vice-pres.—W. D. Vance

Sec.-treas.—J. A. Edwards

Manager—Fred Henning

The boys will accept the invitation of the New Hazelton ball club for a game at New Hazelton on Victoria Day.

### Graduation Exercises

On Wednesday night three of the young ladies in training at the hospital participated in the graduation exercises. In the presence of only a few personal friends of the girls graduation certificates were presented to Misses Grist, Adams and Germain by W. S. Hoskins. Mrs. D. McLeod decorated the candidates with their pins and a handsome bouquet of cut flowers to each. A social evening was then spent.

### Two Miles of Towers up

Wm. Thompson came up from Carnaby Saturday night to spend the week end. He stated that at least two miles of towers for the tram line to the Rocher de Boule mine had been completed. For a couple of weeks they have been delayed on account of bolts, but all other work is going along in good shape. The job should be done about the Twenty-fourth of May.

### Are Coming Saturday

Word has been received that Deputy Minister of Public Works and Chief Engineer Griffith and Wm. Manson, M. P. P., will arrive here tomorrow evening and, it is understood, will spend Sunday and Monday here looking into the requirements of the district in the way of roads and trails. He will have a busy stay but it is felt here that his visit will have satisfactory results.

### Col. Steele is Back

Col. R. G. Steele has arrived in Vancouver after spending the winter at his home in London, Eng. He is now preparing to do the biggest season's work on the Hudson Bay mountain that has ever been done. His base of supplies will be at Chicken Lake as usual. The colonel is expected to arrive here very soon.

Mr. and Mrs. Dan Stewart and Miss MacKenzie will leave next Monday for a visit to Scotland. It is not likely that they will return here, as it is possible that Mr. Stewart will be located at Halifax, N. S., for some time, where he will be in charge of some of the harbor developments.

—P. R. News.

## GOOD ORE SHOWN ON WONDER GROUP

O. B. Wallace at His Property—Trail  
is Badly Needed Over the  
Hill for East Side

O. B. Wallace returned yesterday from a trip to the Rocher de Boule Wonder group where he inspected the tunnel work which has just been completed. The tunnel is in 125 feet and on the hanging wall side they have a fine showing of clean ore. As yet they have not cross-cut to determine the width of the vein, but this will be included in the next work.

Arrangements are now under way for another contract and the work will be started very soon.

The great draw back to present operations is getting in supplies. There is no part of the country

## Neatness

That's what counts and  
what is characteristic of  
Herald Printing

so badly in need of a trail as the north and east slope of Rocher de Boule mountain. This trail has been asked for and when the chief engineer is here he will be approached again and the urgency of its immediate construction pressed upon him.

This trail will not only enable the Wonder group to work the year round, but it will permit a number of other properties on this side of the mountain to be opened up. Under present conditions getting the supplies in costs as much or more than the supplies.

## AMBULANCE NOW ON ITS WAY HERE

Shipped This Week From Vancouver—  
X-Ray Plant Being Rapidly  
Installed at the Hospital

The quarterly meeting of the hospital board was held Wednesday night and progress with the installation of the X-ray plant and other improvements was reported. All the contracts have been awarded and most of the machinery has either been shipped or has arrived except the dynamo which will be along in a couple of weeks. The ambulance which is being transported free of charge by the G. T. P., is now on its way from Vancouver.

The total cost of the improvements will amount to \$7,700 and this amount has been raised to within \$400 or \$500. A few new subscriptions will be welcomed.

The past three months have been very busy ones at the hospital. The total number of days for patients during the past three months was 2268, an excess of 300 days over any previous three months.

## PROSPECTORS FOR THE FAR INTERIOR

Party is on its Way to the Finlay and  
Omineca Rivers Country—  
Wants Quartz or Placer

(Vancouver Sun)

What promises to be one of the best equipped and most ambitious prospecting expeditions embarked upon in recent years is that being projected at Pocahontas at the present time. The leader of the expedition is Frank E. O'Neill, whose whole life has been spent in geological surveying, mining and prospecting. His party will be composed of the best from Porcupine, Cobalt, California and

Nevada.

The country to be explored is that part of British Columbia to the north of the main line of the G. T. P. which is well known to mining men to be one of the richest mineral belts in the west and which up to now has only been partially prospected.

The party will leave Pocahontas about the middle of April and be on the scene of operations as soon as the ice breaks up and navigation is possible on the rivers. They will launch their canoes at the second crossing of the Fraser river and proceed to Giscombe portage, striking a northerly route by way of the Crooked and Parsnip rivers.

It is the intention to thoroughly investigate the low-grade quartzite deposits at the mouth of the Finlay river, proceeding thence to the Omineca and there explore and prospect the silver lead deposits of that country, and probably spend some time in Deserter's canyon.

In the matter of an application for the issue of a fresh Certificate of Title for Lot 427, Group 1, Cassiar District.

NOTICE IS HEREBY GIVEN that it is my intention to issue, after the expiration of one month from the first publication hereof, a fresh Certificate of Title to the above mentioned lands in the name of Hartley A. Cullon, which Certificate of Title is dated 14th September, 1909, and numbered 55R.

## Poultry, Dairy and Farm Helps

### About Trap Nests

A trap nest is an appliance for holding captive the layer until her keeper comes to take up the egg and record the fact that she has laid. By using trap nests the poultryman can keep tabs on individual performances and find out just what his hens are doing in return for his hospitality. A numbered leg band makes easy identification of the fowl.

The advantage of the trap nest is that it guides the poultryman in culling and developing his flock. Knowing exactly which of his hens are drones, he can reject the eggs of such at the breeding time. Having a record of the parentage of each chick, he need never be in doubt of the results of his matings.

The chief disadvantage of the trap nest is that it requires a lot of time to look after it. The keeper must visit his nests several times a day for the purpose of releasing the layers. Fowls kept too long in confinement suffer loss of vigor. It has been stated on good authority that any pullet lay sixty eggs before the 1st of March can be counted upon to deliver upwards of 150 eggs the first year. It follows from this that one needs during only a few months to gather records sufficient for his breeding season. To be worth while the trap nest must be absolutely certain in action. It must keep in the hen that enters and keep out all the others.

### Taking Care of Manure

Among the farmers visited in the prairie provinces in the agricultural survey work, 1913, not one was found to be giving any care to prevent the waste of the barnyard manure. In Ontario, so often called the "Banner Province," 93 per cent exercise no special care to prevent waste. In the maritime provinces, greater care is taken, about 40 per cent of the farmers visited having either manure sheds or cellars for storing the manure. B. C. may well copy this leaf from the book of the far eastern farmers operations.

Prevention is better than cure. Prevent loss of the manure already being produced and it will not be so necessary to buy the expensive fertilizers to build up the sick and worn-out soil. Prevent the loss of the liquids by using some sort of absorbent. Prevent loss from heating by piling and mixing carefully in flat piles, not too deep—and keep it tramped. —F. C. N.

### Big Birde

In a cross-bred class of dressed

poultry at the Birmingham, Eng. poultry show held the first week in December, the first prize was taken by a pair of Indian game and orpington crossed birds, age 6 1-2 months, that weighed 25 lbs and 14 ozs., shown by the Marchioness of Londonderry. Second and third prizes went to the Earl of Plymouth whose Indian game and dark dorking pullets weighed 14 and 15 pounds a pair respectively. A pair of the same cross won first for cross-bred pullets that weighed 16 pounds 4 oz.

In the class for pure bred cockerels the first prize was won by a pair of Indian game birds, 6 1-2 months old that turned the scale at 18 lbs. 6 ozs., the second prize winners being one and a half lbs. heavier—dark dorkings—but not so even as the winners.

In commenting on the heavy birds a Birmingham paper says: "the Christmas turkey will have to look to its laurels, or it soon will be outdistanced in the race for a place in the Yuletide bill of fare by the more humble bird—the cockerel."

Those who pin their faith to the turkey will, however, be glad to learn, says the New York Sun that Lord Rothchild has bred a turkey on his Hertfordshire estate that weighs 44 pounds. These figures seem to point to the fact that the old country poultryman, in addition to knowing how to breed winning layers, knows also how to feed to produce flesh.

### The Dust Bath

If you have provided a dust bath in your poultry house you will not be troubled much with lice, providing that your dust bath is all right. Ordinary coal ashes are too dry and absorb too much oil from the feathers to be considered a success in this respect. The best dust bath that you can get is very finely sifted dirt. With this you can mix Persian insect powder which you can buy in quantity at the store. This should be placed in a box the hens can get in, but where the litter is not apt to be scratched into it.

Many times the dusting boxes become filled with litter, with the result that the very purpose for which they have been made has been defeated. It is very essential that the hens have this opportunity to dust themselves at all seasons of the year. Lousy hens will never do their best at egg production, and when annoyed by lice they are in a continual state of unrest. Make it your business to look carefully after this branch of the work.

## NEW HAZELTON IS PICTURESQUE

Many Expressions of Wonder at the Beautiful Scenery Surrounding This Town

Everyone who visits New Hazelton and sees the high level bridge and the Hagwilget canyon are unanimous in their praise, both of the bridge and the magnificent view obtained from it. "It's the greatest picture I ever saw," "the most beautiful scenery in the world," "nothing can touch it along any railway on the American continent," and other similar expressions come from every visitor. There have been a number of visitors here already this year who have travelled in all parts of the world and they vote for New Hazelton's bridges. Together with the big steel suspension bridge, the Rocher de Boule mountain, the Bulkley river and the canyon, there is the old Indian bridge along side, but two hundred feet below, which is in itself a great attraction. Truly this one bit of scenery is of great value to New Hazelton.

A picture including all the features above mentioned has been issued by the Omineca Herald in three colors. Send forty cents to this office and a picture will be sent to any address.

## NEW COLONIZATION SCHEME STARTED

To Establish Model Farm and Teach Non-Farmers to Farm—On G. T. P. Main Line

Grand Trunk Pacific officials report to headquarters in Montreal from time to time many interesting colonization schemes undertaken by private individuals or companies along the route in the rich lands opened up by the new transcontinental line. One of the latest has some very novel features. It is to be carried out under the direction of Mr. Albion Hunt and Hal Carlton, London. They intend to colonize a tract of about 14,000 acres lying near Kinsella, about 75 miles east of Edmonton and on the main line.

The novelty of the plan lies in the fact that the promoters will endeavor to attract in particular the man who has not had any previous experience in farming. They will have a model 320 acre farm in the centre of the tract. This model farm will be run on a strictly business basis, while, at the same time it will be of educational value also.

It will show the new settlers how to build the best and cheapest kind of houses and other buildings, and the best manner of raising horses, cattle, sheep, hogs, poultry, grain, fodder crop on a commercial paying basis. The model farm will also teach how to best handle the land itself from the initial breaking to the harvesting of the crops.

Arrangements will be made for marketing all kinds of produce, and advice will be given as to the necessary equipment of the farm including both live stock and machinery. If the new comer does not wish to buy equipment for the first year, but is desirous of confining his operations to fencing, building and general initial development work, then the model farm will break his land and put in his crop at moderate cost.

It has been arranged to temporarily house at Kinsella any settler while he is putting up a house and if those who are bachelors desire they may board at a low rate at the model farm.

## CITIZENS ORGANIZE FOR BIG VICTORIA DAY CELEBRATION

Work Divided Among Several Committees and All Have Started to Work—Sir Richard McBride and William Manson Have Been Invited to Attend

Left over from last week An enthusiastic meeting of the citizens was held last Friday night in the Northern hotel and organized for the Victoria Day celebration. The members of the citizens association united with the baseball club and they will work together for a big two days celebration.

Rev. D. R. McLean was elected president of the main committee and A. M. Lawson is secretary-treasurer.

The following committees were then appointed:—

Finance—President, Secretary and C. H. Keddie.

Sports—O. B. Wallace, Neil McIver, B. C. Affleck, G. O. Graham, A. M. Ruddy and L. B. Warner.

Publicity and transportation—C. H. Sawle and J. A. Riley.

Entertainment—Fred Brewer, Jas. Riley, E. B. Tatchell Geo. Jennings and W. J. McAfee. McAfee and Riley are to have charge of the dance.

Decoration—Miss Ham, Miss Nixon and Miss Layton.

Reception—D. McLeod, Mrs. McLeod, W. J. and Mrs. MacKenzie, F. C. McKinnon, I. An-

ger, Mrs. Anger, C. H. and Mrs. Sawle, C. H. and Mrs. Keddie, E. B. and Mrs. Tatchell, G. O. and Mrs. Graham, D. G. and Mrs. Stenstrom, Jas. and Mrs. Richmond, John and Mrs. Newick, R. J. McDonell.

The secretary was instructed to communicate with Sir Richard McBride extending an invitation to be present and open the celebration, this being the first to be held in this town.

### Watch for Rabbits

Rabbits among the dogs of the Cowichan district have been discovered. Also in one or two other sections. The Dominion Veterinary Department is handling it so far as animals are concerned, but Walter Bapty, M. D. acting-secretary of the Provincial Board of Health, wishes to be notified of any suspicious cases which may appear. His department is prepared at any time to forward complete treatment for hydrophobia which must be administered to the person as soon as possible after being bitten, which is some weeks before the symptoms develop.

### Chief Minty Honored

The Fernie Free Press said:—“The Waldorf Hotel dining room was the scene of a very pleasing and enjoyable function on Wednesday night when the constables of South-East Kootenay gathered together to do honor to their departing chief, A. C. Minty, who leaves at the end of the week for Hazelton, his new headquarters. The constabulary of the district and friends to the number of 25 were present, and Mrs. Jennings had prepared a banquet that made them all glad to be there. Speeches and songs helped to pass a jolly evening, during the course of which Chief Minty was made the recipient of a handsome gold watch, engraved as follows:—‘Presented to Chief Constable Minty by the constables of South East Kootenay, April 15, 1914.’”

### Sentence Commuted

J. Mulivahill, the murderer of Charles Kelly, Burns Lake, last fall was given life imprisonment. He had been condemned to die. The Court of Appeal upheld the conviction and the Supreme Court of Canada refused a rehearing of the case. The Department of Justice was then appealed to and Mulivahill will spend the rest of his life in jail with others of his kind.

Smithers people have announced that they will hold a celebration on July 1st.

### OVERHEARD AROUND NEW HAZELTON

Angus Stewart spent a few days in town last week.

J. T. Smith, Aldermere, was a visitor in town last week.

Chief Walter Owen was in town the fore part of the week.

J. M. and Mrs. Lynch, Smithers, were in town the fore part of the week.

D. McLeod will return Wednesday night after a business trip to the south.

Rev. D. R. and Mrs. McLean will move into the residence just vacated by Mr. and Mrs. Kerr.

G. Hodgins is adding a second storey to his residence at Five Mile and making other extensive alterations.

Miss Margaret Crawford leaves this week to spend three weeks in Vancouver. She is now improving nicely after her recent illness.

Jas. Kerr expects to leave in a week or two for the prairies. Mrs. Kerr will be a guest of D. G. and Mrs. Stenstrom for the summer.

Rev. D. R. McLean was a visitor in Prince Rupert this week and while there he did some boosting for the celebration here on Victoria Day.

Tennis promises to be a popular pastime here this summer. Two courts are now being prepared, one at the bank and one at Mr. Keddie's home.

The Bodine boys arrived from Vancouver last week and the first of the week left for the Omineca country where they will put in another season in the placer diggings.

Geo. C. Hartley came in Monday night after spending some weeks in Spokane at his home. He is now on his way to Endako where he will spend the spring and summer.

Wm. Steele returned to the Manson Creek country this week where he will remain until July when he expects to take a trip to the outside.

Wm. Lynch spent the fore part of the week in town. He has been at the front on business for several weeks. He says that New Hazelton still leads as the big business centre.

General Superintendent W. C. C. Mehan passed through here Tuesday morning on his return from a trip east with the “spike driving special.” They were delayed by land slides both ways.

## Auction Sale

—of—

## PRINCE GEORGE

### LOTS

The government of the province of British Columbia will sell their holdings in the G. T. P. townsite of Prince George by public auction at

## VANCOUVER

MAY 19th, 20th, 21st

At the Grand Trunk Pacific Development Company's auction sale of PRINCE GEORGE, held in Vancouver last September, I was a heavy purchaser for local investors, and am pleased to state that many of them have resold their holdings at a good advance—in several cases profits of from one hundred to five hundred per cent have been realized. If you wish to invest at the forthcoming sale, and are unable to be present, I am prepared to buy for you. Write to-day for information, maps, etc.

**Edward F. Doyle**  
SMITH BLOCK THIRD AVENUE  
Prince Rupert

## Why New Hazelton?

The answer is: Because it has **Made Good**

We will be glad to give you more particulars on New Hazelton and the New Hazelton District

E. N. Winslow  
Secretary

NEW HAZELTON has lead and silver deposits that are larger and cover a greater territory than those that have made the Cobalt district famous. New Hazelton is the distributing point for supplies for a country larger and richer than all the New England states combined. New Hazelton has agricultural lands that surpass those of almost any other section in richness. New Hazelton is at the junction of two fertile valleys that contain more than a million acres of productive lands. New Hazelton has all that has made other great cities in Canada, and more.
